The Quality Connection

LEONI

The LEONI Group

The LEONI group is an international manufacturer of wires and cables for the electric and electronic industry as well as a manufacturer of wiring systems for the automotive industry.

Decades of experience in producing high-quality cables and the latest production equipment have made us one of the leading manufacturers of special cables in the world.

We draw and bunch our wires ourselves and do tin-, silver- and gold plating in our own facilities. We have also a compounding department, state-of-the-art extrusion lines for conductor insulations with an extremely thin wall thickness, braiding equipment for accurate shielding as well as high-capacity stranding machines and cable extrusion lines. Because we do every manufacturing process ourselves – from wire drawing right up to cable extrusion – we are able to design and manufacture sophisticated special cables meeting the requirements of audio-video applications.

That's the reason why the perivox team can offer you a tailor-made cable solution "Made in Germany" on short notice. We have also at your disposal a well-assorted stock of standard cables covering a wide range of applications.

Made in Germany

The wires and cables from our perivox product range are completely designed and produced in our plant situated in Roth and this makes the difference to low price imported goods.

Using high-grade and tried and tested materials, a cable design which reflects our decades of experience and a state-of-the-art production equipment guarantee products of high quality.

The perivox product range offers a large variety of cables which are designed, developed and manufactured by LEONI for professional and semi-professional applications. Those applications are e.g. audio and broadcasting studios, O.B. vans as well as event, conference and stage technology. The following page shows some of our products which we hold on stock for you – without asking for a minimum length to be ordered. We are of course also able to design and produce sophisticated special cables meeting your requirements.

Our service

- No minimum length
- Permanent diversification
- Customised manufacture

Types of cables

- Microphone cable
- DMX cable
- Rack cable
- Speaker cable
- Multicore analog/digital
- Video cable HDTV
- Triax camera cable
- Composite cable

perivox®

O.B. Van Microphone Cable, peripur®

Type: NF-WP
Cross Section: 0.10 mm² – 0.50 mm²

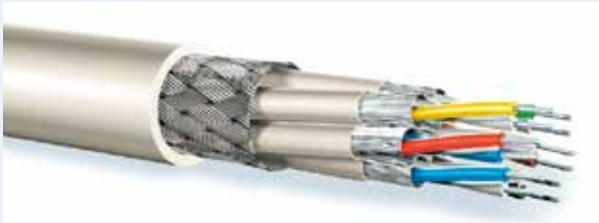

Flexible microphone cable with lap screen, non-crush, breaking resistant, cold resistant, easy spooling and unspooling

Modulation Cable, 110 Ω, PIMFY

Type: 02YS-PIMFY-CY
Conductor: AWG 23/1

AES/EBU modulation cable with plain copper conductor, 110 Ω characteristic impedance, foil shielded pairs, overall braided screen, pair and outer sheath insulation PVC

Multichannel Video Cable, 75 Ω

Type: MU-VI
Base: Video 0.6/2.8 AF

Multiple coaxial video cable, 75 Ω characteristic impedance, easy laying, soft outer sheath

O.B. Van Master Cable, peripur®

Type: MW-C PUR
Cross Section: 0.25 mm²

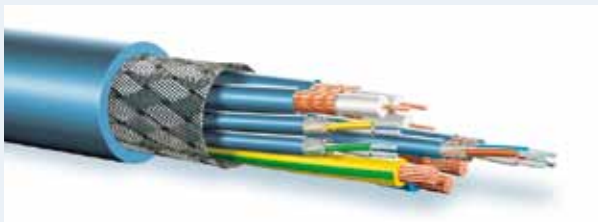

Flexible multicore cable, non-crush, cold-resistant, easy spooling and unspooling, resistance to abrasion and cutting

Composite Cable, peripur®

Type: KOMB 3-4-3
Description: 3x video, 4x audio analog, 3x power lines

Flexible composite cable, with/without overall braided screen, non-crush, cold-resistant, easy spooling, small dimensions
